**Dolomite Lime** sweetens your soil (raises the pH) to improve plant growth and maximize fertilizer performance. Natural limestone is ground into an ultra-fine powder then prilled into uniform granules for easy spreading. This allows for a rapid reaction time once applied to garden soils and lawns. Dolomite lime supplies calcium and magnesium, essential nutrients that are required for proper plant growth and development.

**GUARANTEED ANALYSIS**

CALCIUM (Ca)	23.5%
MAGNESIUM (Mg)	9.5%

Derived from: Dolomite Limestone  
CAS# 16389-88-1

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:  
2% Lignosulfonate

Moisture content does not exceed 1.0%

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

**APPLICATION RATES**

2 cups ≈ 1 lb; approximately 10 cups per 5 lb box

Most garden plants prefer a soil pH between 6.0 and 7.0. Performing a complete soil analysis or using a soil pH home test kit before application is recommended. If you do not know your soil pH, use the recommended application rates below.

Lawns: In spring and fall, apply 2.5-5 lbs per 100 square feet and water in well. Results may be enhanced if applied following aeration.

Vegetable Gardens & Flower Beds: To prepare new gardens, apply 1-1.5 lbs per 100 square feet by evenly distributing over soil surface by hand or spreader. For soil pH maintenance, test and apply seasonally as needed.

Trees & Shrubs: Spread ½-1 lb per 1" of trunk diameter around the base outwards to the drip line and water in well.
